DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The incorporation of essential material (on the last full paragraph of page 15) in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3654

On lines 3 and 5, the recitation of "the spinning reel" lacks positive antecedent basis in the claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6-11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent no. 5,947,400 to Tsutsumi.

Tsutsumi discloses a fishing reel screw operation structure that is adapted to be attached to a reel unit of a fishing reel, comprising: a screw-in portion 4b adapted to be mounted to the reel unit, the screw-in portion 4b having an outer threaded portion (unnumbered) and a tubular portion 4 that is integrally formed with the threaded portion; and a cylindrical screw member 9a mounted to the threaded portion and having an inner threaded portion (unnumbered) on its inner peripheral surface, the inner threaded portion being configured to be screwed onto the outer threaded portion of the screw-in portion 4b; the tubular portion 4 of the screw-in portion having a diameter that is larger than an inner diameter of the inner threaded portion of the screw member 9a; an operation member 9 that is non-rotatably mounted to an outer peripheral surface of the screw member 9a; an outer diameter of the screw member is larger than an outer diameter of the tubular portion.

Allowable Subject Matter

Claims 4, 5, 12, 13, 15 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
